

Designar::DL

Designar::ContainerAlgorithms< DLinkedList< T >, T >

Designar::DLinkedList< T >

```
graph BT; A[Designar::DL] --|> C[Designar::ContainerAlgorithms< DLinkedList< T >, T >]; B[Designar::DLinkedList< T >] --|> C;
```

The diagram illustrates a class hierarchy. At the top level, there are two classes: Designar::DL and Designar::ContainerAlgorithms< DLinkedList< T >, T >. Below them, Designar::DLinkedList< T > is shown. A horizontal line with upward-pointing arrows at both ends connects Designar::DL and Designar::ContainerAlgorithms, indicating a relationship. A vertical line descends from the center of this horizontal line to Designar::DLinkedList, indicating that Designar::DLinkedList inherits from both Designar::DL and Designar::ContainerAlgorithms.
